POWER TRANSFORMER**

Welcome Message

Vision & Mission

Extreme Enerji Elektrik Ltd. Şti. started its operations in the energy sector in 2015, specializing in medium voltage material supply and the repair and maintenance of distribution transformers. Since 2017, the company has shifted its focus entirely to the manufacturing of distribution and power transformers under the brand name Extreme Power Transformator, expanding its factory space and machinery park. The company continues to produce transformers with power ratings ranging from 25 kVA to 2500 kVA at various voltage levels.

The Extreme Power Transformator brand continues to enhance the capabilities of its clients in numerous projects, including hospitals, solar power plants, wind power plants, dams, airports, military facilities, shopping malls, hotels, and more.

Our mission as Extreme Power Transformator is to manufacture cost-effective transformers without compromising on quality, based on our customers' requirements. To date, we have produced nearly 8,000 transformers of various power ratings and voltages, which are being used in both domestic and international markets with high customer satisfaction. The transformers we produce are designed according to customer requests and needs, following international standards such as IEC, TSE, NEMA, and the European Parliament and Council's 2009/125/EC (ecodesign) directives. Our operations and products are certified under TSE 267, ISO 9001, ISO 45001, and OHSAS 18001. Type testing is conducted in laboratories such as BUYAL, ELKO, KEMA, and ICMET. In addition to the domestic market, the products we manufacture are also exported to Europe, the Balkans, Asia, the Middle East, and Africa.

EXTREME POWER TRANSFORMER

Quality Certificates

Our References

Extreme Power Transformer has produced transformers domestically for major electricity distribution companies such as TEDAŞ (Turkish Electricity Distribution Corporation), Enerji SA, UEDAŞ, TREDAŞ, ÇEDAŞ, as well as many individual customers. These transformers are used in solar power plants, shopping malls, hospitals, fuel stations, agricultural irrigation projects, and factories. We manufacture transformers for many customers in Europe, the Balkans, Africa, and Asia, tailored to their demands and in compliance with standards such as ECO DESIGN, IEC-EN 60076, and EN50464-1.

Distribution Transformers - Sample

Three - phase oil - filled and hermetically sealed transformers
50 - 3150 kVA, 7.2 - 24 kV, Ecodesign, A0Bk max., Cu winding

Technical data

Standard	IEC 60076, EN 50464 - 1/A1 Ecodesign regulation EU no. 548/2014
Transformer design	Completely oil - filled, hermetically sealed Corrugated tank, cover bolted
Indoor and outdoor use	Continuous loading
Cooling system	Overload capacity - IEC 60076 - 7
Ambient temperature	ONAN, mineral oil - EN 60296 *
Thermal class	$\leq 40^\circ\text{C}$ *, altitude ≤ 1000 m *
Corrosion protection	105 (A) - temperature rise winding/oil 65/60 K Coating system - class C3 - EN ISO 12944-5 *

Electrical characteristics

Rated power High voltage (HV)	50 - 3150 kVA *
Tapping range HV	6 kV, 10 kV, 20 kV, 22 kV *
Low voltage (LV)	$\pm 2 \times 2,5\%$ * off-circuit
Frequency	400/231 V, 420/242 V *
Insulation level	50 Hz *
Vector group	Um 24 kV LI/AC 125/50 Um 12 kV LI/AC 75/28 Um 7,2 kV LI/AC 60/20 Um 1,1 kV LI/AC - /3 50 - 160 kVA Yzn *

EXTREME POWER TRANSFORMER

Nüve (Manyetik devre) / Core (Magnetic circuit)

Our core designs are carefully selected based on loss ratios and are crafted from silicon steel sheets with thicknesses of 0.23, 0.27, and 0.30 mm, in accordance with our customers' requests.

Sargılar / Windings

ALÇAK GERİLİM / LOW VOLTAGE

Low voltage coil windings are wound on automatic machines using either aluminum or copper wire or foil, depending on the customer's request.

YÜKSEK GERİLİM / HIGH VOLTAGE

High voltage coil windings are wound on automatic machines using either aluminum wire or copper wire, depending on the customer's request.

Deney Test - Kalite Kontrol / Experiment - Quality Check

BOŞTA KAYIP TEST / NOLOAD LOSS TEST

YÜKTE KAYIP TEST / LOAD LOSS TEST

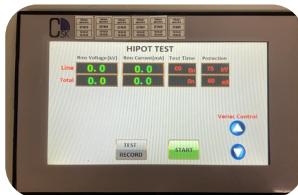

SARGI DİRENÇ TEST / WINDING RESISTANCE TEST

FREKANS TEST / FREQUENCY TEST

ALÇAK GERİLİM İZALASYON TEST /
LOW HIPOT TEST

YÜKSEK GERİLİM İZALASYON TEST /
HIPOT TEST

SICAKLIK TEST / TEMPERATURE TEST

YAĞ DELİNME İZALASYON TEST /
ÖL BREAKDOWN DI-ELECTRICK TEST

After the mechanical assembly, baking, and oil filling processes of the transformers are completed, our expert engineers perform measurement, quality, and durability tests in the testing laboratory. Our testing laboratory is independently audited every year by accredited organizations.

To further improve our quality, we continue to make new investments every year.

Aksesuarlar / Accessories

Buchholz Rölesi

Transformatör kapağı ile genleşme deposu arasına montajlanır. Transformatör içindeki rızalarla çeşitli gazlar açığa çıkar ve bu gazlar röledeki hıznede birikerek şamandıraları harekete geçirir. Şamandıra hareketi ise iğaz ve/veya kesme mekanizmalarının çalışmasını sağlar. Röle içerisinde iki adet 5A 250 VAC kontak mevcuttur.

Buchholz Relay

Its assembling between transformer cover and conservator tank. In case of any faults, various gases are released. By the accumulating of these gases, buoys are in motion. Motion of buoys actuated alarm and/or cut off switch. Relay has two 5A. 250VAC switches.

Hermetik Koruma Rölesi

Genellikle hermetik tip transformatörlerde kullanılır. Röle gaz tahlisesini, kazan iç basıncını ve yağ sıcaklığını gösterir. Ölçülen her bir parametre için ikişer kontak bulunmaktadır.

Hermetic Protecting Relay

This relay is usually used for hermetically sealed transformers. It is monitored the discharge of gases, the pressure in the tank and the oil temperature. It has two contacts for each measured parameter.

Nem Alıcı (Silika Jel)

Sadece yağ genleşme depolu transformatörlerde kullanılır. Yağ hacminin azalması esnasında kazana giren havada bulunan nemin yağa karışmasını önlüyor. Boyutları transformatör arıma gücüne göre değişiklik gösterir.

The Breather (Silica Gel)

The breather is used only for transformer with conservator tank. In case of oil volume decreasing, the breather keeps the moisture of the air which enter to tank. The size of breather determined by the rated power of the transformer.

Alkollü Termometre

Alkollü termometre hermetik ve yağ genleşme depolu transformatörler için kullanılabilir. Yapısında herhangi bir kontak barındırmaz. Kapak üzerine kaynaklanan termometre cebine montajlanır.

Alcohol Thermometer

Alcohol thermometer can be used for hermetically sealed type or transformer with conservator tank. It is without contact. It is mounted in the thermometer pocket which welded on the transformer cover.

Manyetik Yağ Seviye Göstergesi

Yağ genleşme deposuna montajlanarak, yağ seviyesinin gözlemlenmesi için kullanılır. Opsiyonel olarak kontaklı modelleri de kullanılabilir.

Magnetic Oil Level Indicator

The magnetic oil indicator is used in order to display the level of the oil in conservator tank. If required, the level indicator with optional contacts can be used.

Kontaklı Termometre

Bu cihaz üzerinde 2 adet ayar kadranı ve 2 adet okuma kadranı olmak üzere toplam 4 adet kadran bulunmaktadır. Bu kadranlar; Anlık yağ sıcaklığını, Ulaşılan en yüksek sıcaklığı, İğaz sıcaklığını, Açıma sıcaklığını gösterir. İğaz ve açma için 2 adet 5A 250 VAC kontağı bulunmaktadır.

Thermometer with Contacts

This equipment has totally 4 dial plate. 2 plates for reading, 2 plates for setting. These plates monitoring; Oil temperature, .Max. measured temperature, Alarm temperature, Cut-off temperature. It has 2 pieces of 5A 250 VAC contacts for alarm and cut-off.

Basınç Emniyet Valfi

Sadece hermetik trafilarda kullanılır. Kazan iç basıncı, valfin ayarlandığı basınçta ulaştığında açılarak dışarıya yağ tahlisi yapar. Bu tahlile kazan iç basıncını düşürerek, muhtemel kazan yırtılmalarına engel olur.

Pressure Relief Valve

It is used only for hermetically sealed transformers. It opens briefly in the event of tank pressure equal to set pressure of the valve. This events protect the tank from possible tank damages.
